

Use Vinegar Solution to Kill Weeds

Formula:

- 1) Pour 30% Vinegar (often obtainable from Amazon) into a large container enough to hold at least 1 gallon.
- 2) Add 2 cups Epsom salt. Stir till it dissolves. and
- 3) Add 1/4 cup dawn (or similar mild) dish-washing soap. Stir gentle to keep down sudsing.

Application:

Pour solution into a cheap hand or lawn pump sprayer. Apply to weeds until solution runs off.

Weeds should die within 24-48 hours. As this is a top kill you may need to reapply the solution every three days until the weed totally gives up.

Note: The vinegar will destroy the seals of the pump sprayer if this solution is not thoroughly rinsed out after use. No vinegar residue should remain or else your pump sprayer may be found useless the next time you try to use it.
